# ABOUT THE TECHNOLOGYCATALOGUE.COM

TechnologyCatalogue.com is an online platform that connects tech start-ups and scale-ups and end-users to solve industrial & energy challenges through rapid deployment of technologies. Recognizing the challenges that both Swedish Industrial, Manufacturing and Energy companies have when searching for and comparing available solutions, and the challenges faced by Swedish-based technology startups when deploying their technology, this platform is all about connecting technology providers and technology end-users with the solutions they need.

#### For End-Users:

End-users can quickly explore, review, and compare multiple options to find the right solutions for their specific challenges.

#### For Tech Start-ups and Scale-ups:

The platform allows tech start-ups and scale-ups to showcase their technology solutions, helping them to connect with end-users and bring their technology to market.

#### BENEFITS

INCREASE VISIBILITY AND REVENUE AT A FAR LOWER COST

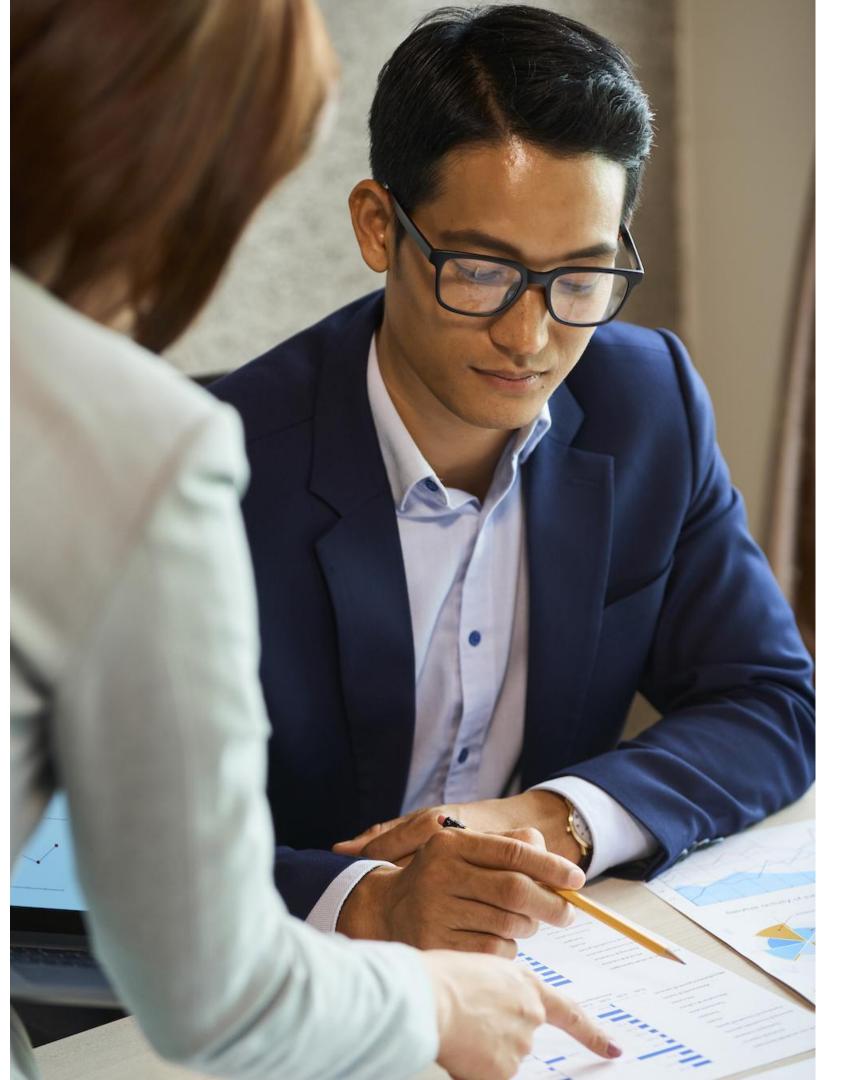

ENHANCED KNOWLEDGE SHARING
AMONG THE SWEDISH
TECHNOLOGY PLATFORM MEMBERS

FACILITATED SYNERGIES
BETWEEN TECHNOLOGIES

ADDITIONAL SERVICES TO HELP
YOU IDENTIFY AND REACH THE
RIGHT BUYERS FOR YOUR
TECHNOLOGY

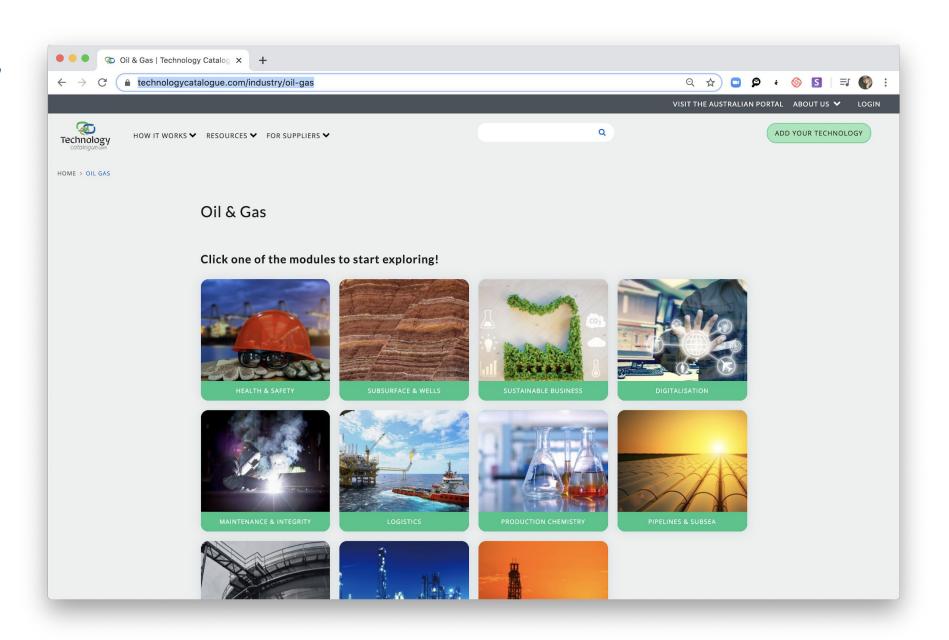

#### **Our Services**

We provide an online platform to help you market your technologies and attract potential clients.

Effectively, our platform is a 24/7 online exhibition accessed by companies in the energy industry from all over the world. We offer marketing solutions to help you grow your business. By showcasing your technologies on our platform, you are visible to highly-qualified technology buyers that are 3X more likely to convert into your customer.

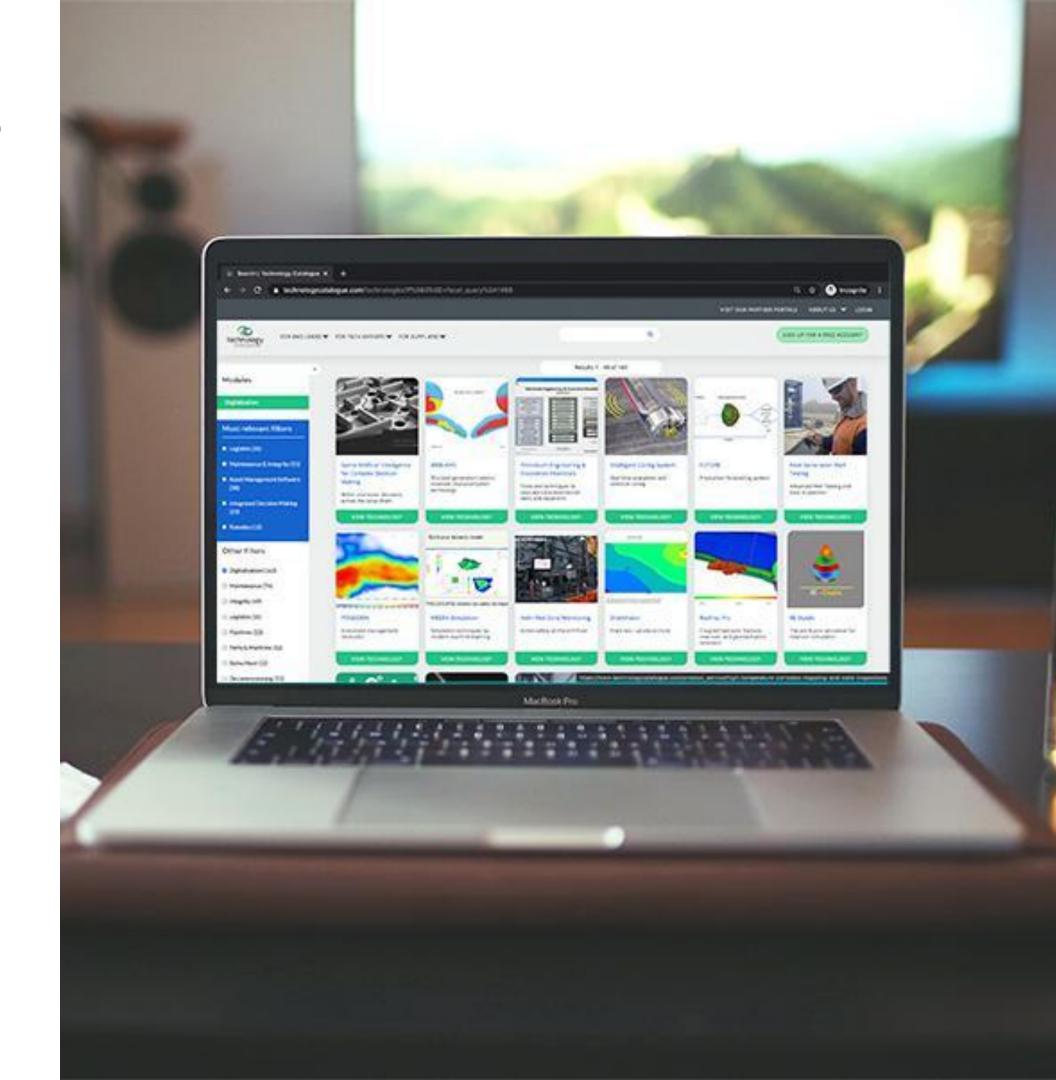

## Adding Your Technology is FREE

- A unique page per technology to display your technologies
- Technology visible to all global users of TechnologyCatalogue.com.
- Reviews from experts & users
- Showcase deployment track record

#### Your Own Technology Page

- → A unique page to display your technology
- → Technology visible to all global users of TechnologyCatalogue.com and all the relevant partner platforms
- → Access the Data Analytics Dashboard (providing powerful stats on your page visitors)
- → Reviews from experts & users
- → Showcase deployment track record
- → Get contacted by verified end-users from the industry directly

## VISIT OUR MATNER PORTIES. ABOUT US Y METODUROR Y METACCOUNT Y ADD YOUR THOMSCOOK your best 15/03/2021 16/12/08/25 Do you have questions about your analytics or need Total clicks: 81 support to get in contact with companies showing an young in your technology? Contact us. being line or pap is second.

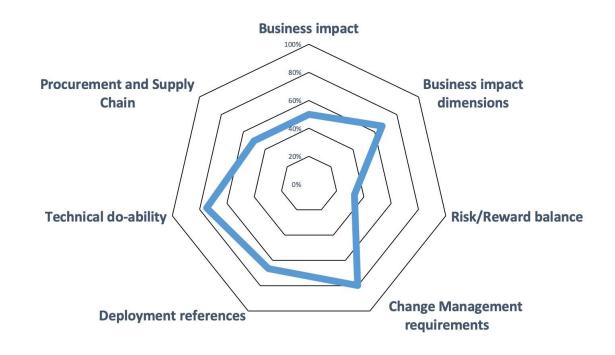

## Market Insights & Analytics

With this functionality, you will get access to data analytics that enables you to understand the market potential of your technology. You gain insights into the performance of your technology page, such as

- → number of page impressions
- → which companies are actively searching for your technology;
- what links were clicked;
- → the average time spent on the page;
- → through which portal the page was accessed;
- → visitors' location;

and data can be filtered by country and/or date! <u>Click here</u> to learn more.

#### Tech Positioning Programme

The Tech Positioning Programme of TechnologyCatalogue.com has turned my perspective on its head. Great Value.

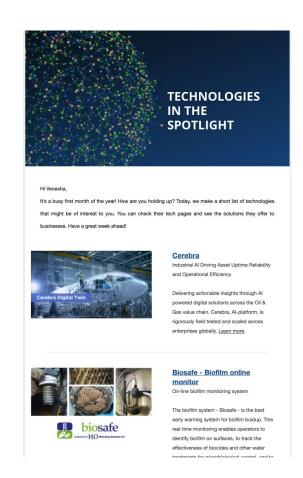

Craig Power - Managing Director - iSol8 Pty Ltd

The "Tech Positioning Programme" is a programme that is based on more than 20 years of technology deployment experience.

The programme helps you to identify strengths and opportunities to improve the overall offering of your technology and make it as attractive as possible to the broadest appropriate customer base.

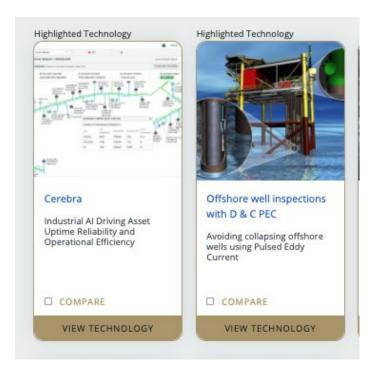

As technology evolves and changes happen in the business environment, it is important to reassess your tech positioning. Thus, we highly recommend doing the tech positioning programme at regular intervals so that you can generate the right customers at any moment in time. Curious about how the Tech Positioning Programme can help you? Click here.

#### Testimonials

"It is a great opportunity to be introduced to new technologies, without having to travel." - Ingvill J. Bækø - Senior Engineer

Operations Technology & Digitalisation AkerBP

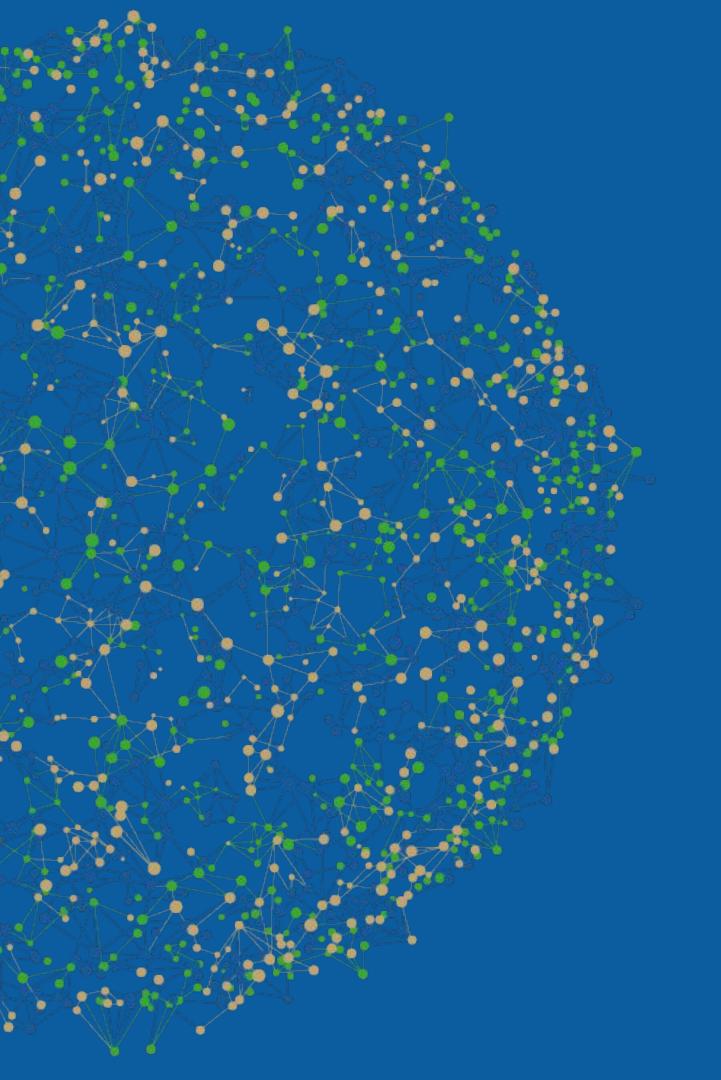

"The (...) workshop gave me a great insight into what we have to think about for our technology deployment. The Technology Stress Test allows us to assess and focus on the critical areas, and then apply the correct strategy for industry deployment." | Timothy Black – Business and Innovation Manager Quasset BV

"Through the Technology Deployment workshop, we validated that our internal process is on par with what is seen as a successful implementation strategy within the Oil & Gas Markets. We can now diversify our technology deployment, with the assurance that we truly manage these variables in a structured approach with a firm strategy standing central to the technology integration into different markets." - <u>Hannes Swiegers – Global Program Management Office Director Fugro N.V.</u>

"TechnologyCatalogue.com are doing phenomenal work to help the overall technology ecosystem" - <u>Srikanth Muralidhara</u> <u>Co-Founder & Chief Customer Officer at Flutura</u>
